The Week's Record at Copper Smelters

Tonnage Shows Gain Over Previous Week-Close of Year May Show Record Production.

From the furnaces of the independent valley smelters during the past week there has poured forth, to pass into the Eastern refineries, 585,274 pounds of base copper builton, as against \$66.05 pounds for the provious week. Each of the smelters displays gains, the United States States showing 251,348 pounds as against

States showing 251,348 pounds as against 220,388.

Utsh Con. shipped 425,397 pounds as against 422,491 pounds. Hingham Congained 4821 pounds on the week's production.

To the total of the independent smelters, must be added the capper contained in the American Smelting and Refining company's matte, which was approximately 225,600 pounds making a grand total of 1,219,274 pounds.

The aggregate for the week with that which has been mentioned for the past few months, will in all probability enable the State to take a record of 60,000,000 pounds production for the year. The shipments for the week closed on the following figures.

With practically all the plants operating at their full capacity, the necessity of enlargement to handle the constantly increasing production is imperative. Additions are now under way in several of the plants, and others contemplate enlargements during 1865. The visit of President Daniel Guggenheim and other officials of the American Smeiting and Refining company during the past week, has resulted in the corroboration of the statement that this company will build another copper plant to cost at least \$1,000.000. The result of the experiments now being made, looking toward an abatement of the smoke nutsance will decide whether Utah will get this great plant or not.

RUMORS OF DIVIDEND.

Victoria and Gemini May Distribute Next Month.

A report current yesterday to the effect that Victoria would present its stockholdthat Victoria would present its stockholders with a Christmas dividend, while seeming to have some foundation in fact, cannot be verified by officers of the company. The meeting of the Grand Central, which was to be held yesterday at Provo, and at which it was thought the Victoria dividend would be declared, did not take place as scheduled, because of the lack of a quorum. C. E. Loose, in answer to a query as to whether a dividend on Victoria would be declared, declined to say anything of a confirmatory nature, mersily remarking that no meeting had been held.

held.

It is known that a declaration of dividend for December was contemplated, but it is possible that it has now been postponed until the first of the year.

The Gemini company, which has paid three dividends of \$0.000 each during the past year was also scheduled for a December declaration of the same value. It appears at this time that the dividend may not be declared until January, a member of the company giving this as his opinion.

TO PROSPECT NEVADA.

Hatfield and Chesbro Leave for Caliente on a Winter's Trip.

As the result of the formation of a intention of exploiting the Nevada gold fields, H. T. Hatfield and Grove Chesbro leave fomorrow for Callente, where they leave tomorrow for Callente, where they will olific for a winter's solourn on the desort. Their intention is to thoroughly prospect the mountain ranges in that vicinity and to locate claims which seemlikely from appearances to give the best results with development.

This company is but one of several recently formed in Salt Lake to take advantage of the opportunities afforded by Southern Nevalla to gold seekers.

The members of the company, which includes these already mentioned, are W. Hatfield of the Salt Lake brokerage firm of that name, Henry Sprague and George Williams.

Tonopah-Goldfield Stocks.

Tonopah-Goldfield Stocks.

The Montana Tonopah has suspended operations for the present. The cause is not altogether clear, but the presumption is that some break has occurred in the machinery at the properties. This is the information received over their private wire yesterday afternoon by James J. Pollock & Co. The Montana shares closed in San Francisco at \$1.65 to \$1.674, after brick trading. Messra, Pollock & Co. furnish the following closings for yesterday on the San Francisco and Tonopah exchange, received over their wire: Belmont, 71@72c; Midway, 54@35; Mac-

To Work Uranium Mine.

F. B. Hammond of Monb returned yes-terday from a sheep-buying trip to Idaho. He will leave in a day or two for his uranium mine fifteen miles south of Thompson's Springs in Grand county, and will being at a second of the seco monphon's Springs in Grand county, and will being at gace the work of getting out the first carload of the product. Assays returned on samples of the ore sent to New York City lead Mr. Hammond to believe that he has a bananza. The ore occurs in the face of a ledge, with enough of it exposed to almost make him wealthy if it is as rich as the assays indicate.

May Be Rich Property.

Special to The Tribune.

AMERICAN FORK, Utah, Dec. 10—The strike which was made in the Wyoming mine by George Tyng and his son, Francis, has developed into one of the biggest strikes that has ever been made in the State of Utah. By very conservative men who are in a position to know, it is estimated that the market value of the same will amount to over one million dollars. Freparations are going on at the mine for very extensive operations.

WEEK ON 'CHANGE.

Market Closes Firm, Following Raids Early in the Week.

Business of a dull week on the mining stock exchange closed yesterday at noon, with a total of shares handled amount ing to 155,654 for which \$39,400.78 was received. Notwithstanding reseate reports from various properties, the shorts from various properties, the shorts seemed to have the edge during the week. During the first day or two vigorous raids were made on stocks which have been much before the public of late. White beaten down for a time, they showed the clusticity due to good records and closed strong for the week. May Day pushed down grade early in the week and sold at 25 cents yesterday. New York also made the object of short attacks, had strong backing.

The morning call of yesterday brought out a flurry in Wabash, which sold at sil and 52 cents. Sacramento changed, hands at 16 and 184 cents, while Daly West appeared at \$12.76, seller 20 days.

The market closed with an array of figures, which are gratifying when prices ruling early in the week are considered.

The Week at Bingham.

All available teams were busy this week on umber, coal, etc., for the mines. A big storm that will blockade the upper coals is indicated and likely to come at any time. A movement is on foot that promises to re-sult in quite extensive work beginning this winter on a group of claims that has been falle for some time.

Col. E. A. Wall has one of his new-fangled separators completed and will soon have it in-stalled at the Kempton mill. Its weight is about seven tons.

separators completed and will soon have it installed at the Kempton mill. Its weight is about seven tons.

Bingham C. & L. teams this week hauled 55 tons of United States lead ore, also 25 tons of ore from Eastman's (United States) lease, 20 tone from Gregorson's (United States) lease and 25 tons from the Utah-Apex.

During the week ending yeaterday the Copper Belt hauled 175 carloads of ore, as follows: From the Utah Copper 4200 tons; Yampa, 390 tons. Commercial, 1220 tons, and Ohio, 640 tons. Commercial, 1220 tons, and Ohio, 640 tons. Up freight hauled 27 cars.

A. F. Holden, accompanied by W. H. Cooledge and E. A. Clark of the United States Mining company, visited the mines on Wednesday, no doubt with increased interest in the Kempton ground, as a sequence of the recent Circuit court decision.

Manager A. G. Lamson of the Gold & Copper company expects to shortly resume operations on the company's property—the main feature for the present being to push the Lamson tunnel from the Dalton & Lark side to give drainage and deep outlet to the mines of main Bingham.

Manager Cairnes of the Valentine continues to report most gratifying results from devel-

Morehouse Makes a Valuable Find

Locates a Vein of Gold Ore of Great Richness in the Nevada Fields.

Bringing with him camples of rock in which it appears as if quartz were imbedded in gold, and which run thousands of dellars to the ten in value, George Morehouse, well known in the city as belonging to a family of mining men, has arrived from the Union district of Nevada,

longing to a family of mining mee, ass
arrived from the Union district of Nevada,
where he has located several claims from
one of which he took the samples.

Mr. Morehouse went to Nevada some
months ago, intending to become associated with a Nevada company near Berlin.
Being a natural prospector, with years of
experience. Mr. Morehouse's attention was
attracted to the possibilities of the district as soon as he arrived there. As a
result he decided to play a lone hand, and
the find which he has made on the west
side of the Reese river, between Austin
and Tonopah, is the result. Almost at
strass roots he uncovered a twenty-twoinch veln of gold, running into the hundreds in value. The samples which he
brings with him weigh several pounds and
are not stray pieces of float.

Mr. Morehouse is of the opinion that the
possibilities of southern Nevada cannot be
overrated, and that there exist in that
territory the best of opportunities for
those conversant with the nature of rocks.

As the result of his find and of several
others recently made, there is unusual
activity at Berlin camp.

Mr. Morehouse will return the first of
the week to the claims, which his partner
is holding down.

SINGULAR FORMATION.

Combination of Free Gold and Wire Copper in Same Ledge.

Special to The Tribune. CALIENTE, Nev., Dec. 10.-T. C. Bulwer and Angus Johnson, owners of the Red Light group of gold-copper claims forty-three miles northwest of Callente, arrived in camp this week. They brought with them two sacks of ore showing high values in native copper, which was in cubes, and wire copper through large blocks of granite. This ore came from the foot-wall side of the ledge, while from the hanging-wall side they had taken blocks of granite. This ore came from the foot-wall side of the ledge, while from the hanging-wall side they had taken a decomposed rotten quartz showing iron oxide and black hematite with free gold. The formation is the most singular of any yet reported in this district and it seems to be a combination of free gold and wire copper in the same ledge, separated from each other by a streak of time in which occurs small pleces of white quartz. They have run a 29-foot tunnel in on this ledge, which at 100 feet changed from granite to this formation. They have had assays of 45 per cent copper, with low values in gold and silver, but have not had any of this free gold ore assayed as yet. They are sending aimples to Sait Lake today for assay. The ledge is four feet wide and lies between granite and quartylite, and has been stripped for 200 feet.

Joe Finch and Eugene Maxwell, halfowners of the True Blue silver-gold group of fourieen claims fifty-six miles west of Callente, are in camp this week a climney of ores showing values of 33 gold and 23 ounces of silver, and have five feet of this ore in a 340-foot tunnel from which they have run drifts northeast and southwest fifty and eighty feet, all in ore. They encountered one ledge three feet wide going \$23 in gold and fifty-six ounces of silver, part of the first northeast and southwest fifty and eighty feet, all in ore. They encountered one ledge three feet wide going \$23 in gold and fifty-six ounces of silver per ton when in 146 feet, and run drifts on the ledge 100 feet in each direction and are now going to resume work on the drifts from the 340-foot face of tunnel. They will be able to make a carload shipment early in January.

Judge Pearley and Myron Flaack, the former of Denver, and the latter owner of the Big Four group of four gold properties close to the upper Virgin river, near Huntsman's ranch, passed through tamp this week en route to the mines. The owner of the Big Four says that he has eighty tons of fore gold ore on the fire.

near Huntsman's ranch, passed through camp this week en route to the mines. The owner of the Big Four says that he has eighty tons of free gold ore on the dump and over 500 tons blocked out which will average 5184 per ton in free gold. He has completed 230 feet of tunnel and drift work and will have the work pushed all winter.

Frank Palmer, president of the Louisiana Purchase Mining and Milling company, whose mines lay three miles east
of Callente, closed a deal this week
whoreby he obtained control of the Copper King group of four mines eleven miles
east of Callente and will at once have
them incorporated under the laws of the
District of Columbia for \$750,000, par value
of stock \$1 per share. There are about
twenty tons of ore going \$45 gold, 500
ounces silver and 24 per cent lead per ton
on the dump, and a test shipment to Sait
Lake smelters will be made is satisfactory
tariff arrangements can be made with the tariff arrangements can be made with the Sait Lake railroad this month.

CHANGE IN FIRM

W. H. Alexander Retires From Salt Lake Mining Investment Co.

The announcement is made that W. H. Alexander has sold his interest in the Salt Lake Mining Investment company to his part-Lake Mining Investment company to his partner. W. H. Tibbals. The business of this company has been a growing one, and Mr. Alexander retires with a handsome reward for the venture. Mr. Tibbals will conduct the company's business in the old office. 209 Dooly block, and will continue on the successful career already mapped out for the company. Mr. Alexander has large interests in the Majestic. Imperial and other properties in Utah and Nevada, and will in due time open an office for the transaction of his personal business, including operations on the mining exchange.

opment work. A vein containing a streak of \$29 gold ore has lately been cut, and among new showings is a streak of rich copper giance that improves with sinking. The old ground on which the Valentine is located bids fair to attract great attention.

Gold Mountain Rivals Goldfield

Rich Discoveries Cause Exodus of Miners and Supplies From Other Camps.

Local business men have recently invested in the new Gold Mountain mining district, which lies thirty-eight miles south of Goldfield, says the Reno Gazette, and have been fortunate in securing eight very promising claims, which have every indication of developing into large and profitable producing mines. The Nevada Goldfield Mining company, as the new company is known, of which J. E. Humphrey is president and J. H. Knuthson secretary, is an aggressive corporation,

phrey is president and J. H. Knuthson secretary, is an aggressive corporation, who, having faith in the district, will develop their property on an extensive scale. Over a week age a complete mining camp and store outfit left here for the new field consisting of two four-horse teams, accompanied by four experienced miners, who will establish the camp and commence mining operations on arrival other equipment for the store with additional miners who have been engaged at Goldfield will leave shortly and within the present month it is expected that everything will be in full operation. On one of the ciaims a twelve-foot strongly defined ledge has been opened up, assaying across the entire face \$5.20 to the ton. The purpose of the company is to sink on this ledge and later to develop all the adjoining claims. The Gold Mountain district has for years been known to be rich in mineral deposits, although never extensively mined or fully developed it has nevertheless been a steady producer in a moderate way. The Chiatovich mines, which adjoin the property of the new company, have been worked by their owner and discoverer in a desultory way the value of their production remains a secret.

On this property is a five-stamp mill mains a secret.

tory way the value of their production remains a secret.

On this property is a five-stamp mill which has been operated almost exclusively in conjunction with the mine. In this vicinity are also situated the Tokap, Norfolk, Kelley and Rattlesnake mines, while the well-known Corbett mines, while are but a few miles distant, have produced high-grade ore for some years past. In this locality there is pienty of timber on the upper claims, while good water is found in abundance on the different claims. From present indications the company are sanguine of their success in opening up some rich properties, while the rapid settlement of the district insures a profitable business for their general store, as well as from the large number of prospectors and miners who are constantly passing through the district aroute to the Bulfrog field, which is some sixty-five miles distant.

ORE AND BULLION

Settlements for Week Show Loss Over Previous One. Sattlements on the ore and bullion receipts

or the week ending Saturday, December aggregated \$183,100. This exhibit as compared with \$589,900 for the previous week, shows cmowhat of a loss. This is due in a large measure to the fact that the managers of several companies are at this time paying more attention to development work than to more attention to development work than to increasing the present production. It is recognized that a number of mines if necessary could double their present production without much effort. Their output must, however, he kept within the bounds set by the present capacity of the valley furnaces. When the arrangements for enlarging and adding to the furnaces are completed, the production will increase in proportion.

The settlements for the day in the open market amounted to \$22,200. McCornick & Co. reported them as they follow: ket amounted to \$22,900 McCornick & Co. re-ported them as they follow: American builton, \$42,900 gold, silver, lead and copper ores, \$50,000. In the metal market silver ruled at \$0 cents an ounce, casting copper at 14% cents per pound, and lead at \$1.50 to \$4.40 per 109 pounds.

Mining Notes.

C. O. Ellingwood and Samuel Levy leave for Alta this morning. Hon. D. H. Peery is scheduled to return from Boston the present week.

The mill of the Annie Laurie mine at Kim-berly is handling 200 tons of ore a day. The Taylor & Brunton sampler received six cars of ore from Bingham, five from Tonopah and one from Tintic.

The Pioneer sampler receipts yesterday were two cars each from Idaho, Nevada and American Fork and three from Tintic.

Herman Greene, cashler of the Bingham Con., spent yesterday at Bingham superintending the payroll disburgements. Three feet of ore said to contain 100 ounces silver and 14 per cent lead is reported as being opened up on the drain tunnel level of the Daty mine.

At a meeting of the directors of the Beck Tunnel company, held at Provo yesterday, the sals of delinquent stock was postponed from December 12 to January 12.
